Introduction to Practice Quiz with AI Mentor

- An online Python code editor integrated into our learning platform
- You can write and execute Python code
- It **compares the output of the code written with the expected output to determine if the code is correct**
- **AI Mentor** is enabled to provide instant, personalized hints and guidance to help you progress smoothly through your coding journey

Here you can find the question along with the instructions and the basic hints required to start writing your code

Question 2 ▾ 1 MARK

Revisit

If Else Statement - Question 1

Problem

Topic Help

Instructions:

You are given two numbers as input. Write a program to check if the first number is greater than the second number or not. If the first number is greater than the second number, print 'First number is greater'. If the first number is less than or equal to the second number, print 'First number is NOT greater'.

Sample Input:

5
10

Sample Output:

First number is NOT greater

Hints:

1. Use `a = int(input())` statement to get the first number as input from the user

```
1 # An if-else statement is a conditional statement that executes different code blocks depending
2
3 a = int(input())
4 b = int(input())
5
6 # Write your code below
7
8
```

You can start writing your Python code here

Please wait 5 to 10 minutes for the quiz points to be updated on the dashboard

The screenshot shows the Great Learning dashboard interface. At the top, there's a navigation bar with 'Dashboard', 'Courses', and 'Excelerate' links. The main content area displays a course titled 'Introduction to Python: Practice with AI Mentor'. A modal window is open in the center, titled 'Quiz Submitted Successfully'. Inside the modal, it shows 'Your Marks: Evaluation Pending' and 'Kept Score: 0'. There are two buttons: a blue 'CONTINUE' button and a blue 'RETAKES' link. Two red arrows point to these buttons with orange text instructions: 'Click on "Continue" for the upcoming content' and 'Click on "RETAKES" if you want to attempt the quiz again'. The background shows a sidebar with 'Content' and 'All Notes' sections, and a main area with 'Attempt' details.

Instructions to be Followed

Practice Quiz with AI Mentor: Instructions

- Use “**TEST**” to execute and test your Python code.
- Use “**AI Mentor**” to get assistance with the code in case you are stuck.
- Kindly wait **5 to 10 minutes** for the quiz points to be updated on the dashboard.
- You can attempt the quiz multiple time by using the “**RETAKE**” button available once you submit it.
- You can mark a question if you'd like to revisit it later using the “**Revisit**” button available.

Power Ahead!
