

Guidelines - Converting IPYNB to HTML files

I. Download the Project File

In Google Colab, navigate to **File** in the top menu.

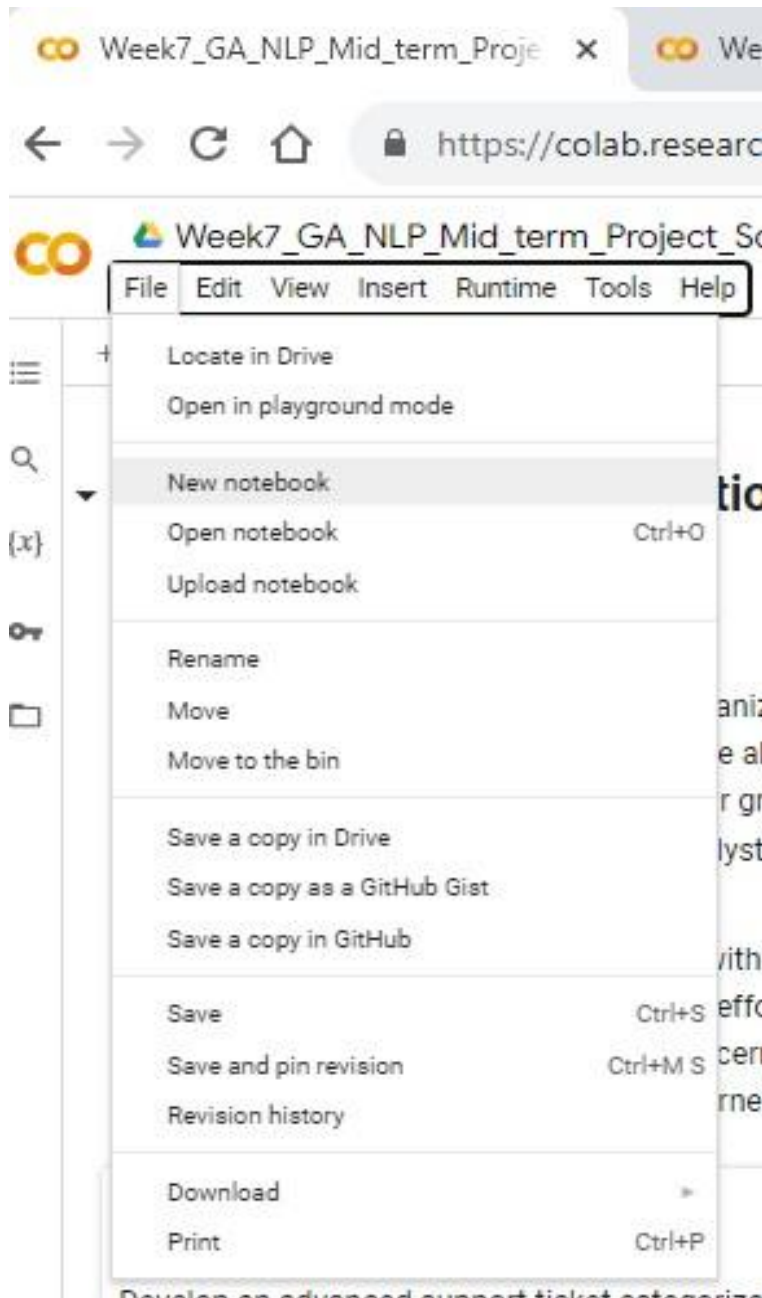

Select **Download**, followed by **Download .ipynb**, in order to download your project file in the .ipynb format.

II. Open a New Google Colab Notebook

Go to **File** in the top menu.

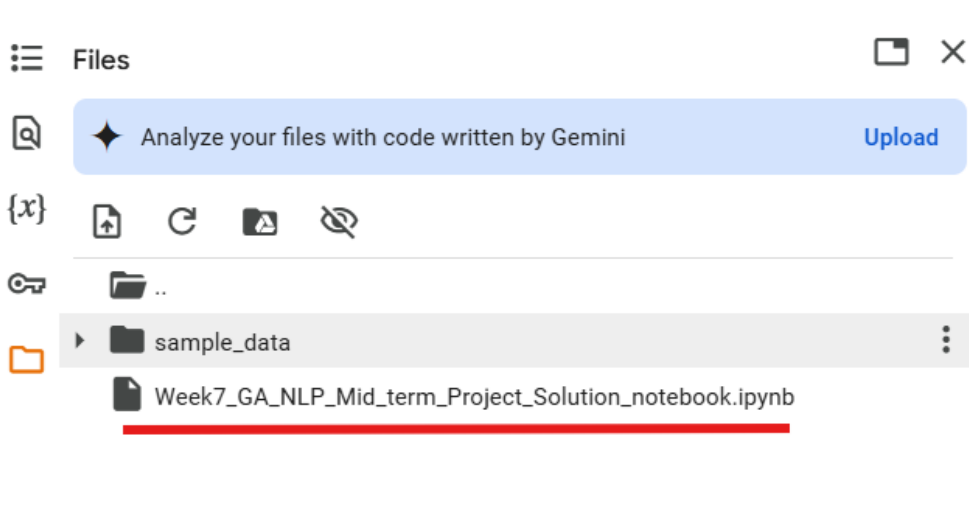

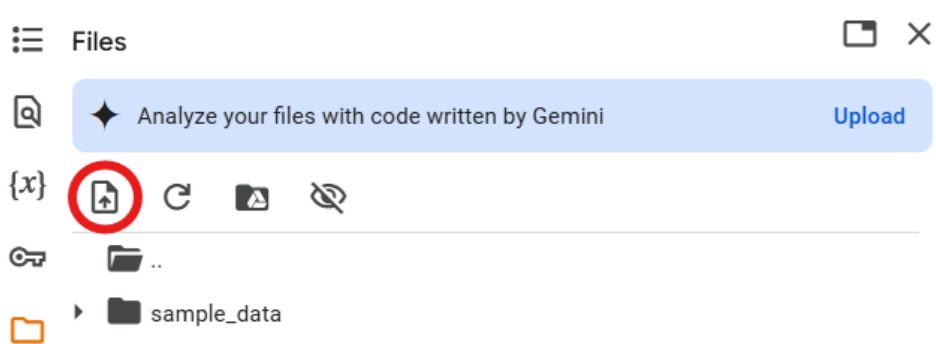

Choose **New Notebook** to create a new Google Colab notebook.

III. Upload your Project File

In the new notebook, locate the Folders section and click the icon.

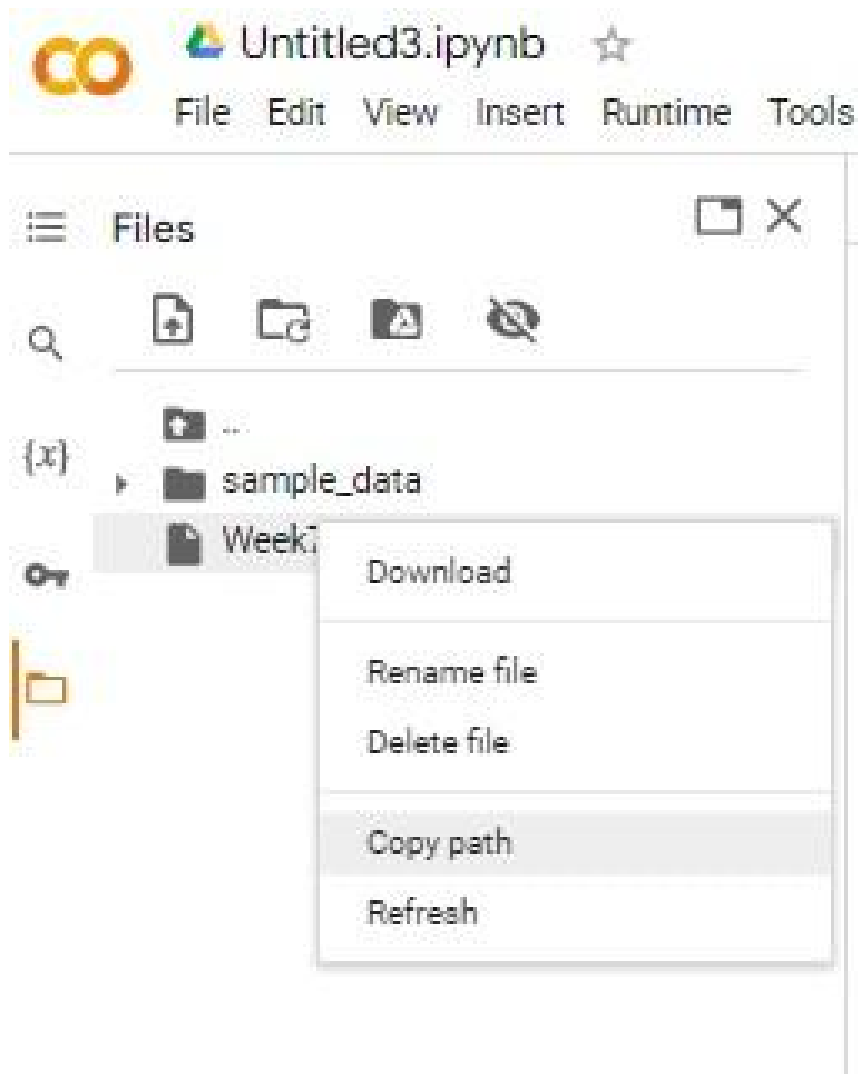

Press the Upload sign (as shown in the image) to upload the project IPYNB file.

IV. Copy the Path of the Project File.

Click the Three Dot Icon next to the Project File.

Select **Copy path**.

V. Execute the following code to convert the file:

```
1 %%shell
2 jupyter nbconvert --to html "<Path_of_the_notebook>"
```

✓ In this case

```
[2] 1 %%shell
    2 jupyter nbconvert --to html "/content/Week7_GA_NLP_Mid_term_Project_Solution_notebook.ipynb"
```

[NbConvertApp] Converting notebook /content/Week7_GA_NLP_Mid_term_Project_Solution_notebook.ipynb to html
[NbConvertApp] Writing 301440 bytes to /content/Week7_GA_NLP_Mid_term_Project_Solution_notebook.html

VI. View the converted File

Click the Refresh Folder icon (shown in image below) to see the HTML file created.
This HTML file can be downloaded and submitted as required.
